

Juicy Boost

What is the Juicy Boost?

A gain/boost pedal that has unique tone colorization along with clean gain.

When the Boost is enabled, the Juicy Boost can be pushed into "Edge of Breakup".

Max Edge of Breakup
Mid Slight Compression
Min No Effect
@ 1v in (0.0dB to -7.0dB)

Amount of Boost
when enabled.
(+2.0dB +6.0dB)

80Hz CUG (-3.0dB)
CRISP (-9.0dB)
FLUB (-1.0dB)

In the ON setting,
you get all the knob functions
and Boost.

In the OFF setting,
you get dry unity gain buffered bypass.
In this setting, none of the knobs or Boost have any effect.
